

Annual Water Quality Reports

Each year, US towns are required to release an annual drinking water report analyzing the water quality of the town's drinking water supply. Your assignment is to choose any water quality report (they are on the front table) and answer the following questions.

Year of Report: _____

Overview ANY 5 of the regulated substance in the table below:

Substance	Overview

Were any of the substances from the report in violation? If yes, which ones?

The report contains other info on drinking water; this info differs from year to year.
Briefly overview to other pieces of information in your report.

1.

2.

Using the internet, explain where Burlington's drinking water comes from (ie the sources and treatment plants). Hint: there are 2!!!!

Where does Burlington's used water go?
